I think that al who are here this afternoon will agree with me -from a minitary point of view alonethat we donire to have our slothing washed and returned to as clean and not comtaminated by being worn surreptitionaly by our washermen, many of whom we know suffer from various skin complaints, and a greater or less number of parasites very unpleasant to think of. That absolute cleanliness in this respect will be the result of having our clothing washed by the steam process under constant European supervision, none asn doubt. Another advantage will be the negarity from baving our clothing, both male and female rented out which is done by our native washermen to a much greater extent than perhaps many here are aware of .- Another advantage will be the short time necessary to finish a given quantity, especially during the rainy meason, when it is often importible to obtain our washed slothes - save the mark-from patiers under seven or eight least, the deordaged nost of \$1.50 instead of \$2 and \$3 must be considered.
